

Instructions for packing the work tables

This is how you prepare your work table properly for dispatch:

IMPORTANT, please note:

Be sure to enclose the return slip with the return!

Work table:

- ✓ treat the table with a commercially available machine oil (alternatively with "anti-spatter")
- ✓ then wrap in the original foil
- ✓ place on the original pallet and place a wooden lid over it
- ✓ secure with tape (as shown, at least 2 tapes per meter)

Accessories:

- ✓ Put the accessories in the box with sufficient filling material
- ✓ Please seal the box tightly with packing tape

Please avoid damage and contamination. If possible, send the work tables back on the original pallet, wrapped in foil, covered with a wooden lid and fixed with tape. If you no longer have the original packaging, please use suitable packaging (also for the accessories) to provide adequate protection against transport damage in order to avoid claims for damages due to damage caused by defective packaging. Thanks for your support!
